In order to boot a PC up, the circuit between PWRBTN and GND header pins must be completed.. Its the sort of thing every child of the 90s that was into Hollywood hacker culture pretended to own, although they probably never thought they actually could.. Then, one night, a eureka and a dash to the test bench to bring to life their glorious monstrosity.. Definitely not one for minimalists like myself, but we can at least appreciate its glory from a safe distance.

Its difficult to see exactly which components are being used, because luminous yellow-green custom loop piping and similarly-lit fans cover most parts of the build.. If you ever played with action toys when you were younger, this build will probably reignite some deep-rooted nostalgia and love for all things flashy and plastic.. In this PC build, however, booting the PC takes the place of Kamen Rider transformation, so that when you push the key fully into the driver, the PC boots up while the driver continues to make its tinny Progrise transformation sound effects.
